Not sure if anyone has mentioned this but sometimes when I use the Ramjet I get 5 shots in a clip when im only supposed to have 4 shots.

For example it happens when you have just fired lets say your 3rd shot. Now you are supposed to have just 1 bullet left but suddenly it jumps back to 2 bullets.

And all 5 shots (including the extra 1) register as actual shots that do damage.

Yep, it's a known bug. It can happen the other way around too (you can shoot only 3). This is very hard to fix though because of the way Renegade's netcode works... :/

On a somewhat related note. I did *complain* to Yrr that with servers that have RR on you can make the pistol glitch so it doesn't ever get passed 1 ammo and I can go along without having to reload my pistol unless I change weapons (Basically it turns into the orca machine gun except the ROF is at the same speed as the pistol). Since RR will be put into the TT patch could someone isolate the problem and try to fix? I could always get you a FRAPs.

RR is not part of the TT patch.

We have copied over some parts of RR, but the patch won't include the whole thing.
