So it is never going to be released even tho you all worked on it till it was finished ? quite a shame really... a working clan ladder and things related to it could be very usefull now and im sure that IF u you do launch it sometime that people will show alot of gratitude towards you guys...and if you "don't give a shit about the ren community" then im sure u wouldn't of even had started work on a replacing mod like linkup  
this TT patch combined with your fully functioning ladder would be the best renegade has had in ... alltime im sure.

think about it...and if your determined on not releasing it... well to bad : (

Thanks for your time.

...It's a WOL-Clone by Xptek. How could you have missed the topic "Xptek" in General Discussions... :/

@Hitman: This is something "internal" that TT would make if they were to make it...Which I doubt, but someone mentioned something about making this for Ren Mods like APB, Reborn, BFD, etc.

This is the first I've heard of it..

This is just my opinion. I don't think we need a new ladder. The game seems fine without it. Sure if

one is made, put it in, it can't hurt... but I don't really think it is worth the effort..

Im not sure how Linkup works but the people in the top 50 of the ladder are generally pointwores and play alot. So I don't really take notice of the ladder.
