Hello,

I was browsing a lot of the files in the getting started section and the level edit files and I noticed that a lot of them could not be downloaded like johnwil's updated version of leveledit. Is there another source were I can get these?

<http://ren.game-maps.net/index.php?act=category&id=91>

Go to "Tools" and you will find John Wil's LE

Also if there is a model you are looking for and can't get it from renhelp.net or can't find it at game-maps.net you can try looking here :

Thank you, I knew that it was there I was just making sure that these errors were brought to the attention of the rest of the Renegade community. Unless of course they had already been like that for some time and I was just not noticing them.

Hiya there.

Most of the files on RenHelp.NET can be found in Game-Maps.NET as well.

In time, we shall include a download page in RenHelp.NET that be linked to Game-Maps.NET where you can download the mapping stuff directly.

bump

I don't know if renhelp.net points to the old or new site at the moment, but on the <http://www.renhelp.net/index.php?load=Downloads> page the link for the W3D Exporter downloads the W3DImporter.zip file, which is the wrong one.

Seems someone has changed the nameservers again, renhelp.net will point to the old site.

renhelp.net domain is not under my control, but this is a wonderful game that someone is doing.

Renegadehelp.net still works.

Thanks m8, but I can't take any credit for it, Oxi and Spacer did the hard work coding the site and editing the templates, it's not prefect, but am hoping Spacer come through in the end to fix the template.

Lucky we didn't get fully into Tiberium, but yeah, was crapy when it got canned after we setup tiberiumwiki and tiberium-maps.
