I'm trying to set Photoshop CS as a default for .dds. I've tried browsing and I've selected the .exe atleast 5000000 times. I've tried doing "Set Default Program" & "Associate File Type" more than once. Both do not allow Photoshop CS to be defaulted. "Set Default Program" does not show Photoshop CS as a prgogram to set defaults.

Any help? Is there an option in the Photoshop CS menu? I'm running windows vista & Photoshop CS v8.0
