Was just wondering if anyone has made a plugin for BR to parse the messages RR outputs into renlog.

If there's none currently available I'll probably give it a try, although my regex is a little rusty.

We made a small plugin long time ago.

I'm not sure if it still works, try it out.

Thanks, I'll test it out later today.

this 1 does not work on my server

could you update the plugin some time ?

for resurrection 1.1.2

It works u must just edit pm file.

Try edit this:

```
#  
# RenCom Plugin by cAMpa, Yrr  
# Version 1.06  
#  
# Tested with BRenbot 1.52 (build 1)
```

package RenCom;

to

```
#  
# RenCom Plugin by cAMpa, Yrr  
# Version 1.06  
#  
# Tested with BRenbot 1.52 (build 1)
```

package Resurrection;

Question, doesn't SSGM break when RR is installed? This is as of last I checked tbh.

Some of ssgm's features break, I don't know about all...so the real question is: Can you run ssgm and rr side-by-side without breaking your server? lol.

It has some unusual side effects, I think we talked about the random unmanned vehicles being spawned on IRC a while back (still not fixed, btw).

I've reported all the bugs I know of on the RR forums.

I think its features make up for the bugs it currently has though, but that's just me
