If you were given unlimited disk space and bandwith and an IP.Board what would you do? Please be serious.

EDIT: What would your goals for using it be? What kind of website would you run?

Imagine a world in which every single person on the planet is given free access to the sum of all human porn*. This unlimited webspace gives us a place where anyone who is kind, thoughtful and intelligent can come and join us in building a better and more rational world.

~Wikipedia

*The legal kind, mind you.

EDIT: In High Definition!

I'd use it to host a page containing everything about General Motors muscle cars from the late sixties to now. Every RPO, VIN, engine part, paint code,you name it.

And lots of pictures of scantily clad women posing with said vehicles.

1.DOWNLOAD THE INTERNET
2.HOST THE INTERNET FROM MY COMPUTER
3.CHARGE $5.00/YEAR FOR ACCESS, UNDERCUTTING OTHER ISPs
4.PROFIT

1.DOWNLOAD THE INTERNET
2.HOST THE INTERNET FROM MY COMPUTER
3.CHARGE $4.00/YEAR FOR ACCESS, UNDERCUTTING RYAN3K
4.PROFIT

In all seriousness, I'd probably just make it a simple hosting site for people for a decent price (One around the same as other hosting services, yet because it'd be unlimited, people would all go for it, etc...).

And get EA to host Renegade off it with a better management than XWIS.

you mean like youtube, but with all the videos porn?
it's been done already.

Just so you know, there is no thing as "unlimited diskspace", as there also are no unlimited harddrives.

When you reach some sort of limit (Probably stated in the TOS somewhere), the Provider will warn you.

Same goes with bandwidth, when you reach some sort of limit, they will warn you/suspend you.

Yea. When I purchased my hosting from SiteGround, they "slipped" and set my limit to "0" which is unlimited. When I purchased it though, it was supposed to be 750GB or something. Just recently, they got pissy at my 26GB of disk space usage... =/

Google already does that though.

I'd go godaddy style and sell it off. I would also have the biggest baddest free pr0nz collection of all time. Oh and I would do everything in my power to put roadrunner and AT&T out of business because they are both twat bag companies.

I see my topic has turned into a joke. Well never mind, because I can honestly see that no one here would consider taking my offer for free.

straight up, I'd host warez on it and put a few ads.

Theres only a few reasons why someone would need unlimited space/bandwidth

1. Porn website
2. Warez website
3. Killer idea website like youtube/facebook etc..

Host lots of open source stuff, but make it *navigatable* unlike source forge, where you have to search for everything.

I would perfer a CPanel.
Well, i would use it for a big modding community. Hosting game mods and making them have a subdomain <modname>.<sitename>.com
There are alot of good mods out there with no good hosting, helping them would be a good idea.
