The newest games just dont cut it for me, apart from Soul Calibur and Tekken.

Resistance, Gears of War are good but i get bored of them too quickly.

I find them too much about shooting and good graphics.

The old FPS before and around year 2000 had elements of platformer genere in them (something I find most new games today lack).

My favorite must be renegade.
I dont play that much video games, but if i play games it will be call of duty 2 or c&c renegade.

Mostly of the time im just working or scripting etc.
Only got 2 games installed on my laptop, and that is cod2 and renegade.

The funny thing about renegade is, that i dont need scripts 3.4.4 because the SSD is already faster then the no load patch inside of those scripts.

SOLID STATE FTW YEAH!

C&C: Renegade
WarCraft II
C&C: Red Alert
Need for Speed II
Duke Nukem 3D
It's not even the gameplay I'm thinking of, just purely the memories they bring back and countless hours I've spent on these games.

Most of my games are on various consoles actually, not many computer games for me.
Almost all my favorite games are from the Super Nintendo.
What can I say, I'm a fan of the classics

This would be way too hard to put in order, so, it's not in order, outside the first few. For example, I could say I like Dead Space now more than I like Red Alert 2 now, but I did like Red Alert 2 more a few years back than I like Red Alert 2 now, so do I deduce I like Red Alert 2 as a "better" game? It's hard for me to say. Therefore, this is just a list of titles I like. Outside the first few, it's not in order. It's on a "first come to mind, first list" basis. Also, these aren't PC games only.

- 1: Final Fantasy IX

2: Final Fantasy VIII
3, 4, and 5 (tie): Final Fantasy VI, V, and VI
6: Final Fantasy X
x: Resident Evil
x: Resident Evil 2
x: Resident Evil 3: Nemesis
x: Resident Evil Code Veronica
x: Silent Hill 3
x: Silent Hill 4: The Room
x: Command & Conquer Red Alert
x: Command & Conquer Red Alert 2
x: Command & Conquer Renegade
x: Command & Conquer Tiberium Wars.
x: Lord of the Rings: The Battle for Middle-earth II
x: Dead Space
x: Doom 3
x: Doom 3 Resurrection of Evil
x: Donkey Kong Country
x: Terranigma
x: Darius Twin
x: (almost) all Super Mario games before Mario 64
x: Dino Crisis
x: Dino Crisis 2
x: Chrono Trigger
x: Far Cry
x: Unreal Tournament III
x: Sim City 2000
x: Sim City 4
x: Metal Gear Solid 2: Sons of Liberty
x: Gran Turismo
x: Gran Turismo 2
x: Gran Turismo 3: A-Spec

I can never order this, nor narrow it down, and that's assuming I remember all of them, which is why I hardly actually do this, but I tried. The first six are definites though.

How come the title of this thread says Your Favorite COMPUTER games ever?

And yet you still put Playstation, Xbox 360, PS2, and Dreamcast on here?

Because Playstations, Xbox360's PS2s and Dreamcasts are all computers. I'm sure he meant to be more general with the title, it seems like the rest of the world understood what he was saying.
