Blazer, is your TS server up 24/7?

I'm wondering because I can't seem to connect to it here at work and I wanted to know if it was our firewall or that the TS server is not up during the day.

Thanks.

Did you remember to download the new client, Jeff? The server is now on a new server, with new capabilities.

<http://www.teamspeak.org>

Same name, different server.

OK, then it is my firewall here at work. Bummer, thought I would be able to chat during working hours.
