I have been trying to get Renegade to work on my vista computer, but I have encountered a problem. Whenever I start renegade, a error saying that the game has stopped working pops up. I have tried everything. I have set all the compatibility settings to XP, I have reinstalled renegade, and I have updated my graphics card drivers.

I really need help. I would be grateful for any that can be provided.

I suppose you tried running in admin mode?

Yes, I am using it in admin mode. Is there anything else I can do?

much trouble with vista, can't really help. Maybe try to run in compatibility with windows xp (if vista has that feature)

Ok there has been a development. I just copied my brother's Renegade files from his computer (he plays renegade on vista, but his works) and pasted them over mine. The difference it made is that it seemed to almost work. It didn't get past the startup icon, but it took a lot longer to crash.

P.S. I am running it with compatibility to XP.

Yrr wrote on Fri, 27 February 2009 15:06 Stop running Renegade in Admin Mode!

I just tried it. Still doesn't work.

If it helps, here is what I found in the event log:

General:

Faulting application game.exe, version 1.37.0.1, time stamp 0x3e304677, faulting module game.exe, version 1.37.0.1, time stamp 0x3e304677, exception code 0xc0000005, fault offset 0x003947a0, process id 0x15e0, application start time 0x01c99924a8fe92f6.

Details: game.exe
1.37.0.1
3e304677
game.exe
1.37.0.1
3e304677
c0000005

Quick question, did you update your Renegade to v1.037 before trying it? If not, you need to do so..

I'm planning on installing XP as a secondary operating system. Do you think that will work?

Might work... hard to say.
