K, so I can connect to every other server n\_P. When it comes to connecting to St0rm I get negotiating firewall port. Firewall port negotiation timed out. It is only on this server that this happens, so I'm led to believe it can't be a clientside problem, yet st0rm insist theres no reason I shouldn't be able to connect. I have the same problem with their IRC. Help pl0x =/

Tried disabling windows firewall n it didn't work. Can't think of anything it can be as It's only this one server I can't connect to or see their IRC/Forums. It's really frustrating.
