you can still have your field like normal and have the lights just place the renamed textures in your data folder.

Ye I like the Field the way it is too, but this is really good. I think C&C Under would look good like this aswell, It makes it look like the mining grounds.

Nice work GenBlacky!

I am working on the same things as you lol I also had added those lights and tiberium smoke. And I am modifying the complete tunnels.

Hey bro you were asking me about this in OT the other day. When I first downloaded it I had the lights:/ I don't know why others didn't get them. It may have been before you updated it as well. But everything's fine with me

Update

Figured out how to change the tunnel walls without changing the Agt.

Report any bugs such as weird textures, our texture not changed on tunnel wall.

Blacky not sure if you hex edit your map model the same as me, but for field I think its the first 24 gd top2.tga are the tunnels and the remaining 12 are the AGT.

hmmm, works fine for me I wonder why it do that to yours and not mine. I only hex edited the ones that were attached to the tunnel meshes so I think.
