So i created my own server last night, ive got brenbot working. im connected to noobstories irc with brenbot.

I added my name to modlist but when !auth myself nothing happens, i do !showmods and theres no mods in server. How do i get mod status on irc aswell. I dont think biatch is working on the server.

Thankyou for your time

Mod status is determined by the level of access you have on IRC. If a member has +v on IRC, he can access less commands than someone with +hop or +aop.

You can determine who can use which commands in commands.xml .

ok thanks, at the moment no one has any status on irc. How do i change this?

and how do i know if biatch is working

nope didnt work, i can use the dh but it blocks the damage i get no messages from biatch. Maybe i missed something, or forgot to do something.

If someone would kind enough to tell me how to set up biatch, im using brenbot, and brenbot connects to the irc channel.

Thankyou

Your original post sounded like you wanted to test biatch to make sure it was working. But, thanks Gozy for understanding what he was saying.

It blocks bh, but doesnt tell me if im using it.
Yeah i did wanna test it but forgot to install the plugin, thanks guys.

I did try it out, i used the *cheat name removed*injector to use a custom objects, it picked up the pt hack but i didnt get any messages about damage hack. It was the hack that turns the pistol into a rocket/nuke launcher. I dont know, maybe ill try another dh, or bh.
