Renegade X is an Unreal Tournament 3 total conversion mod, and our intention is to remake the Westwood classic, C&C Renegade. It is a war-themed mod, with two unique factions, each with its own play style, weapons, vehicles, and structures.

Our latest trailer:

We have a large, diverse & enthusiastic team, and just recently Renegade X scored 3rd place in the annual Mod DB 'Mod of the Year' (MOTY 2009) awards out of thousands of other mods. If you're looking for a mod, then consider the positions we have available:

Character Artists: We need a character artist, capable of modeling current generation style characters - high poly & low poly models, normal maps and textures.

Environment Artists: We require an environment artist for building textures, both interior and exterior.

Weapon Artists: We need a weapons artist, capable of modeling and texturing weapons. We will also consider artists who can only texture weapons and not model them.

Renegade X will look great on your portfolio Thank you for your consideration!

I will also add that applicants must be able to take criticisms of their work professionally and not personally. We're remaking something that already exists so although there are certain artistic liberties that can be taken (see other Renegade X art and how it is different from C&C Renegade), if we don't think it looks right you're going to be redoing it. Possibly with multiple revisions.
