Just "updated" my system to vista home premium 64 bit...OMFG....

ATM i tried to apply the registry fix to get Leveledit work.
But the well known entry dont exist in vista 64.

I have an entry: HKLoclaMachine/Software/Wow6432Node/ElectronicArts/EA Games/Command and Conquer The First Decade, where I set the "InstallFolder"-Key to

C:\Program Files (x86)\EA Games\Command & Conquer Die ersten 10 Jahre\Command & Conquer Renegade(tm)\Renegade\

but this doest work.
Anyone solved this?

EDIT: Never mind, skim reading causes useless answers! But yes, the entry under Wow6432Node is the right one.

EDIT 2: Isn't the path supposed to have renegade.exe on the end of it?

it seems to be solved. there are two of such entries.
and sometimes there must be an "\" at the end, sometimes not. strange.
