Heh, yes, this is a copy topic. Flame Tank - Slightly slow, superb armor, extremely strong against vehicles and buildings, bad range. Light Tank - Excellent speed, good armor, fairly powerful, great against almost everything. APC - Pretty obvious here. Nod Buggy - Great infantry stomper, decent firepower, superb speed, crappy armor. Stealth Tank - Good speed, good firepower, awful armor, poor range. Mobile Artillery - Amazing damage, awful armor, slow. If anyone wants to add to that, feel free.

Recon bike. Can run circles around mammoth tanks. Awesome firepower. Reload rate poor. Horrible armor.

Well, I certainly can't say anything about it for multiplayer since I'm not beta, but the single player hack(thanks to PlanetShaun) apache is very fast, almost buggy fast. It's fairly powerful(then again, the enemies in SP are weaklings) and it can't take very much punishment.

I'd say something else about stealth tank. Decent speed, low armor (but still not bad) High firepower (especially against building, think it's stronger than flamers), poor range. Usefull for ambush and sneak attack. (Just gotta know how to use it)

apache, slow turret swing, slower than humvee, tendency to bounce away when you "eject" at high altitude
