Hello,

I've got a problem with my renegade connection.
Previous week i could play on every renegade server, but this week i can't play it. I can't connect to irc.gamerz0ne.com on irc and when i've started renegade and i want to the server list i get the error: Operation timed out. I use Renegade Resurrection to and a lot of servers are now red in Resurrection.

How can i fix this? My router is ok and i already tried to flush the DNS, but still nothing works.

Thnx
RidoYugo

Have you tried setting your computer into DMZ mode in the router settings? If your router is plugged into a modem unplug the router and use the modem, see if that fixes it.
