How do you increase the max # of vehicles & mines without typing in vlimit & mlimit everytime?  
Is there a way using hud.ini?

Check the ini's in your Server and Server/Data folder, open a ini press [CTRL] + [F] and type in "Limit" there you can search, im not sure if theres another way to change it just try

What ini files in my data folder should I be looking for exactly?

Well in some mods that have a higher vehicle limit, I noticed these 2 files inside:

expvehfac\_0.cfg  
expvehfac\_0.txt

they have nothing to do with this right?
