I wrote a little tutorial which I put on my site, it shows some basic skinning and how to add effects using MIP maps!

I got this idea by seeing a arty with such effect. Does anyone know who made it?

Anyways check out the tutorial here. Only program needed is Photoshop and XCCMixer!!

<http://www.renegademodels.comze.com/Tutorial%20Menu.htm>

Any comments will be appreciated.

And for the effect view this video, I am also showing off a little bit of my building exteriors

DEFINITELY something I will give a try. I actually may get to it later on today. I'll have my outcome posted up later on Thanks for the tut bro. I was going to ask you how to do this effect on msn when I saw this effect in your airstrip.

That effect was made with 3d modeling programs. so you have to edit w3d for it

But this is only DDS editing which means you only need photo editing software. so you don't need to use that complex modeling program

Ahh I see. I was trying it out yesterday but ran into a snag. When you get on msn, I need to talk to you about this tut. Also your building interior modification.

Btw Di3hard, the links are down on your site for the tuts.
