Wow. That looks pretty bad-ass. You going to release that when it's done?

The tress definitely do not fit the scene. Is it possible just to replace the model with palm trees to make it work? I've seen it done server-side on objects, it should work for tiles too, but I don't know for sure.

Glad to see that I could be of help. Now it doesn't look as weird - it looks rather awesome now.
