Here is a link for a Master Chief: <http://hce.halomaps.org/index.cfm?fid=4138>

If someone could make a havoc replacement with this that would be great!

There's already a Master Chief replacement for minigunner, it shouldn't be hard to switch it around for Havoc. I wish I knew how to, I'd do it, but It would probably come out with no texture again

I'm bored and can rig infantry (and anything else really), so I'll do this up.

EDIT: Or not. 3ds/Gmax crash when importing the 3ds file.
