Subject: WOL files for The first Decade

I recently purchased the first decade so my son could play renegade as well. After installing it and trying to sign on to WOL, it said the files were out of date and I needed new files.

So I either need to find these file or find the no cd patch and use the original renegade I have.

Any thoughts?

I don't think I've heard of that error, you sure it wasn't this one: "Your installed version of Westwood Online is incompatible with this product. Please reinstall the Westwood Online componet."?

Get a screenshot of the error if it wasn't the one I mentioned above.

Yes it might have been that one. Sorry on the run right now, lot's of projects. Let's say it is this error what would you do.

The only install I have for WOL is from that group of CD's.

Download this and run it and select only "WOLAPI" install. It will install the latest version of WOL.

PS. This is in the FAQ btw.
