I do the entire thing, the 8 letter password.  
It still won't work. It says "Connecting to Westwood Online"  
But, it never connects.  
After a while it says:

"Unable to connect to server.  
Firewall negotiation complete."

Might seem stupid: but do u have a firewall? Also, could you post what's in the  
C:\WINDOWS\system32\drivers\etc\hosts file (open it with notepad and copy paste)?
