Like 75% of you havnt tried it on multilayer practice, just to see what it can do. 6 months or so ago i got my mate to join a server which i made with a password, so i could see what it does to learn from it. From learning what it does ive caught alot of people using it. I even tried using DH hacks on my own server to test if biatch was working. I dont see the big deal tbh. From Queen i have seen nothing not even as small as a lag kill from him in game and his KD has never pointed towards being a cheater,Justification in banning a player whom posts an SS while not in your server is not justified proof, And would how ever be disappointing to see this happen at this point.

This is not me sticking up for him it is my observation of him over the past 6 months while in game playing along side of him.

Seriously,

If you are running *cheat name removed* in a LAN game to take screenshots (with no1 else in it), it means you are utterly retarded, OR you run it everytime when starting up Ren (habit), OR you used *cheat name removed* in a public game, then switched over to a LAN game without quiting Ren.

Now give me VALID reason why you need to run *cheat name removed* in a LAN game, WITHOUT any other players. WITHOUT any others players, it has NO use testing a cheat.

This proof is enough proof to conclude him as a cheater.

@Nz,

Cheaters can also play smart while running cheating. The ppl who obviously use cheats will often get banned, but there are also ppl who safely use cheats, without getting banned.

And if I'm not mistaken, all of your screenshots for your skins have been taken with that name. I seriously doubt that's someone else if they have all been taken with that name :/

Oh that's right...you are sticking up for your man! GOOD JOB!

NZ wrote on Sun, 12 April 2009 18:12Justification in banning a player whom posts an SS while not in your server is not justified proof,

Actually it makes it much easier to find cheaters. A murderer who killed in Europe is still a murderer anywhere else on the globe. What you are saying is we have to find him killing someone else outside of Europe to arrest him. Now that's what I call simmering horseshit.

Renguard is designed to stop hacks by constantly checking your game.exe for any changes that were SUPPOSED TO BE MADE with the hack.
It also checks game2.exe,data and config folders for any .w3d files and any objects.ddb.

Good game, sir.

yes you can cheat and not end of discussion cause you still havent answered my question.

The cheat in question is used when your running renguard and want to cheat while running renguard. If your not using renguard then will a cheat thats used to get around renguard work??

Will this cheat do anything to better your game if your not using renguard?

ive never downloaded or used it ever.   and i like how your trying to spin this on me when I'm just asking a question to try and clear queen. if you ever play ren with me it will become very clear to you I dont cheat lol

So instead of trying to find out if i cheat why not just answer the fucking question.

If you dont use renguard what good does the cheat mention do?

Subject: Re: [skins]

...

I'm not trying to say you cheat. It's just that *cheat name removed* is pretty old, 2-3 years old or something? Most admins/mods got some knowledge about it (what it does and doesn't, flaws etc).

Now you are saying that you know nothing about RGH, while you are a admin/mod (?) at RenBattles, for quite some time? I'm kinda sure you got some knowledge of *cheat name removed* too...

@ Your question,

RGH stays *cheat name removed* with or without RenGuard...

@ Goztow,

If you type in *cheat name removed*RGH (twice in a sentence), only one of them gets filtered out.

Also, if you type in *cheat name removed*RGH, with a space between both words, the first one gets filtered out + the space gets removed.

Example: Test Test --> *Oops*Test.

well i dont use it, have never downloaded it ever. When it first came out it was suggested on another server I modded on at the time that we download it to see what it does. I said no. I'm very anti cheat. I think if you suck that bad you should go find a new game to play.

Its not hard to spot someone cheating in my opinion. I don't need to download every cheat to know when someone is using it.

Now I've googled and I can't find anything that says the cheat in question can be used without renguard nor can i find anything that says it has to have it. So thats why I'm asking because I don't know. Now we've wasted 6 posts all on one simple question.

Does the cheat in question do anything for you if you don't run renguard?

hmm interesting. so its a hook around renguard but still works even when your not using renguard.

I would suspect many here who are throwing queen under the bus probably use this cheat. i even found one who posted in this thread to be using it while googling for the answer. (wonders how many here panic)

Well Queen, sorry but I tried. I don't know if you use it or not but please don't use it on renbattle.

And for the rest if you have to cheat, renegade isn't for you go find another game.

It's not a hook around Renguard anymore for quite some time. The creator promised he wouldn't hook into renguard anymore, so he hooked it into renegade in a way renguard cannot detect it. So he kept his promise AND kept renguard utterly useless.

I don't have access to the censor words list so I can't change it unfortunately.

Everyone here seems to look over the fact that his first reply was to deny that he took the screenshots, something that's VERY hard to believe. If you believe he took the screenshots and you see him deny it, then there's only one conclusion to make. Will you, as server owner, take the risk? Be my guest .

Like 75% of you havnt tried it on multilayer practice, just to see what it can do. 6 months or so ago i got my mate to join a server which i made with a password, so i could see what it does to learn from it. From learning what it does ive caught alot of people using it. I even tried using DH hacks on my own server to test if biatch was working. I dont see the big deal tbh. Do half you which are mods ban for evidence on other servers, no you dont. So go ban me too

Use your head buddy, If he is so used to having that little *cheat name removed*1.3.3 text up in the corner to post a screen shot with it, without realizing anything is wrong it, means he uses it a lot.

GG and nice ban. no need for retards who need aid to be able to aim on a 7 year old arcade shooter.

Gozy, this "DELL" is most probably the computer name that loads up during LAN play IF you choose not to type in a custom nick while setting up the game.

My computer's name is "ULTRA". Whenever I want to play a singleplayer LAN game (to test skins) and click on Multiplayer LAN in the main menu, the next screen shows the field to enter in a custom nick. Unless you have changed it before, this field has the computer name by default and for me it is always ULTRA. It is always in caps.

That could be the case here.

EDIT: DutchNeon already mentioned this in the first page:

I won't STFU because a cheater says so.

You say you don't cheat. Well, why is that *cheat name removed* in top of your screenshot(s)?
It's, as I already said, enough proof that you are cheater.

Quote:Also I dont cheat in games, all my stats will prove that.

That doesn't proof anything.

Quote:Also I do not know cheat name removed.

Your screenshots show the opposite.

Quote:BTW some of u know an awful lot bout cheats? HOW?
U seem to know all about how to get around it too HOW?

Now, I know a lot about cheats because I know a lot of the websites where ppl get them from.
Heck, I even read the topics on their forums... + I used to be a mod at the Fnfall/Gamerz0ne
servers.

Quote:And why after so many skins and movies and such (if I used it so much) has it not shown
up before? HMM HOW?

Maybe because you were smart enough that time to turn *cheat name removed* off...

Quote:WHo the frak r u to call me a cheat when u dont know me never played with me?

The screenshot(s) are enough proof that you are a cheater, even if we don't know you.

Edit: You removed the screenshots from photobucket? LOL

Queenhunter, first you've "never heard of it", then it was "my mate took the screenshot", now it's "I
had to use it to find out what it was".

Look, it seems like you're now at the point no of no return. NOTHING, that's NOTHING, you can say, will "prove" your innocence now.

You have 2 options. Quit RenForums and move on to some other game to humiliate yourself on, or keep arguing with us and maybe have this thread end up in the Hall of Fame.

He failed. We all know that, he's trying to bullshit his way out.
Any mod knows about *cheat name removed* and other hacks because the have to in order to SPOT THEM.
Anyone else, you can blame.
Hell, when I saw *cheat name removed* at the top left corner of you're screen, I thought it was an anti cheat.

But when Gozy pointed it out as a cheat, we all caught on and made accusations based on the evidence you've brought against yourself.
And also, if you were making movies, maybe you made sure you turn it off, and SLIPPED UP.
So don't try acting like we're the cheaters. Its you.

Not from what I have seen. He probably removed them due the fact that two of his "DELL" screenshots had a cheat on it, destroying his reputation (the screenshots in this topic).

No matter what you post, you cannot change peoples views on him now or that of server owners choice of banning him in their servers. - So, posting to prove his so called innocence is useless, you can't change peoples minds.

queenhunter wrote on Tue, 14 April 2009 00:00 I ve Removed all my skins and posts from REN forums
Due to their negativity regarding my skins and posts anyway.
If u would like they are available elsewhere like RENBATTLE.NET
Bunch a dam Hypocrites if U ask me.
They think what they want, But I dont have to listen to it LMAO
I give ema name and it doesnt matter.
Anyhow, I will continue to play the way I always have and make skins,
They just wont get to see em or use .
I found some were examining my photobucket site and you tube sites
and as far as I am concerned, they werent invited.
so to piss them off I removed stuff. If they were that efficient at hunting down cheats, they might find themselves the targets LMAO

Queen even denies it on the Renbattle forums.

http://renbattle.net/plugins/forum/forum_viewtopic.php?1042

Of Course, the mods support him...

Quote:Lucky u I will only post skins here.
if those idiots were that effficient at hunting cheats there would be none,
as in looking thru all my posts pics vids.
And would someone explain to me CHEAT NAME REMOVED?
it seems to be there hangup and I dont have a clue.
or better yet forget it like UN.
thx see u ingame soon.

Now would that in a certain way mean that he is saying that Renbattle mods are the best in catching cheaters, while they actually are supporting a cheater?

@ Darknight,

I could make a really long post to support my statement about him bring cheater, and that stats don't proof a thing if someone is cheating or not.

I'm aware that you could say that I would cheat, as stats don't proof a thing. Fraps does though. I have been banned 4-5 times on C&C Renegade in the past. I have also been unbanned all those times, as I often had Fraps proof that I didn't cheated at the moment when they thought I cheated (RGH and able to see stealthed sbhs/stanks).

And to clarify something. I seriously don't care if Queen cheated or not. It's just that he is denying that he used *cheat name removed* while there is good proof that he did. I always enjoy discussions, and especially if "friends" support a person who obviously is lying.

Just in case someone hasn't clarified this already:

Renegade uses your computers name as a player name by default when you play a LAN game. So, if he has a Dell computer, its name would obviously be Dell by default. Therefore if he goes to set up a LAN match and doesn't bother to change his name, the name 'Dell' would be used because it is his computers name.

What does that mean? It means that the name "Dell" isn't the persons actual in game name. If they were to join a multiplayer match, their name would be the name they made themselves, not their computers default name.

That was already said 2-3 pages ago.

Are you sure? Because the default for me was Renegade.

They are removed, and such there is no need to discuss the skins.

When I host my own LAN game my name is auto set to DELL2005(cause Dell computer), so he is saying he isnt "DELL" well he is just lying because he probably has a Dell computer that auto set the name to "DELL". In other words dont believe anything he says, cause he is dumb and posted a ss of himself cheating :/

Sorry i just read someone else posted the same thing, so just proves the point even more.
