for start, it has 2 gdi logos, better edit the original logo, the there are no missles in at the missle launchers, but the rest is good

Looks pretty nice. I'd say add some textures to it. Maybe some dirt marks or something. Looking good so far

Thats a good effort. Mammoth tanks are hard to skin.

Yes make the missles look more rounded like missles. Also make the edges around the corners so smooth, the textures kinda makes the tank look blocky.

A respectable effort! I give it a solid 6, fix the missile pods and add some shadow around and it just might get an 8.
