Hello People,

Ive got some problems with NR or FDS.
Server files are doing good its at aow , sniper etc.

But:

I dont hear sounds when NR is going online,
or any comment are not working.

Dont you guys know how to fix this?

Thnx for helping!

I don't understand the problem...does the FDS show any error messages, and what exactly does NR say in the IRC channel.

no problem message in fds or NR.

The commands : !help , !commands etc dont work.

The sounds when NR starting up in the server dont work.

Thats my problem. And automessage/rules wont show up.

Are you sure that NR is connected to the FDS correctly?

Are you sure there isn't a setting wrong in NR?

I don't have a clue about NR though, I hardly know anyone using that, and I don't use it myself either.

what kind of program you use?
im trying JBServ but got error with installing.

Well I personally use BrenBot, so you will have to wait for somebody else to help you out.
