hiya. I just logged onto n00bstories a minute ago, and Renegade suddenly shut itself down. Renguard came up with this:

"[01:04] You have joined n00bstories.com AOW/CCM.
[01:04] Your attempt to use the lan-exploit has been logged and will be reviewed.
[01:04] You have been disconnected from RenGuard, Morbid89."

I don't even know what a lan exploit is, let alone how to attempt to use it. I went on Renegade fine earlier today with no problems - when I logged on just now I didn't do anything different to normal and it came up with that. What's a lan exploit, and how can I prevent this from happening again?

I racked up some LAN exploit's myself.

Just ignore these events, its Renguard being a bitch.
