well, tbh it's kinda stupid to do both: post hack sites, and try to hide hack sytes. It's just like looking for p0rn. Google..

So what else are the forum admins to do? I don't really want to be on a community that thinks it's okay to post hack sites for the game that's already overcrowded with cheaters.

I tried many different settings but I didn't like most of them, I even tried bump mapping it lol. I just
decided to turn down the reflection and used World Space reflection environment. I added all the
gmax files to the zip so you can change if you want.
