ok, i released the final version of my old hud now (i do it, because 3 years ago, some retarded dude with name "Canadacdn" stole it from me and released them for public... (was my first and crappy build)

you need 1280-1024 resolution to play with it (you don't need any custom .dll files, GayGuard or Ressurrection updates... ONLY script 3.4.4 by Jonwil.

if you played with different game resolution and you wanted to modify hud.ini, go ahead all maps inside+my C&C_Islands one

p.s. that screenshot from not public build and wont be released (just basic features... i dont want to make new SS because i am lazy LAMO)

you have to put all files from archive into data folder, them set resolution and play

if i forgot something, post the question here ok?

UPDATE: if you use specific resolutions, download hud.ini

Ah no offense mate! I like the HUD but it would be good if the armor and health have different colors to make it easier to see when you lose health.

hi there. im new to these forums(obviously). I have tried and tried to make it work but to no avail i have discovered that my resolution will not go above 1024x768 so it is a huge fail on my end. the hud looks sweet. Wish it would work for me Im running 3.4.4 btw. I even tried the fix for specific resolutions and that was a fail also
