Sir Kane wrote on Tue, 19 May 2009 22:29That doesn't even remotely look like the C&C 3 APC.

I only used C&C 3 textures to make it, so its C&C 3 style. I never sayed I was recreating the C&C 3 ÄPC. I don't even know what it looks like, and I dont give a shit about it

First of all I don't see the shine for the GDI logo on the front on mine. Also you kind of go rid of the window as well there is the window, but now viewport for it - kind of important.

Watch it buddy, also you just wasted half a page by quoting me to only say three words that aren't even relevant. There is no need to quote a message right above yours. ^_^

The logo on the side was supposed to look like that. I gave it less visibility in photoshop so it fits in with the texture.

The logo on the front has shine for me because I use bloom and you probably don't. Bloom effects on bright textures.

And about the viewport.. I might fix that

I have bloom, but it still does not shine. But why would you make the logo hard to see?
