Topic title says all

Im already experimentating with a program called 'NVidia FX Composer' but im wondering if this is the best (free) tool?

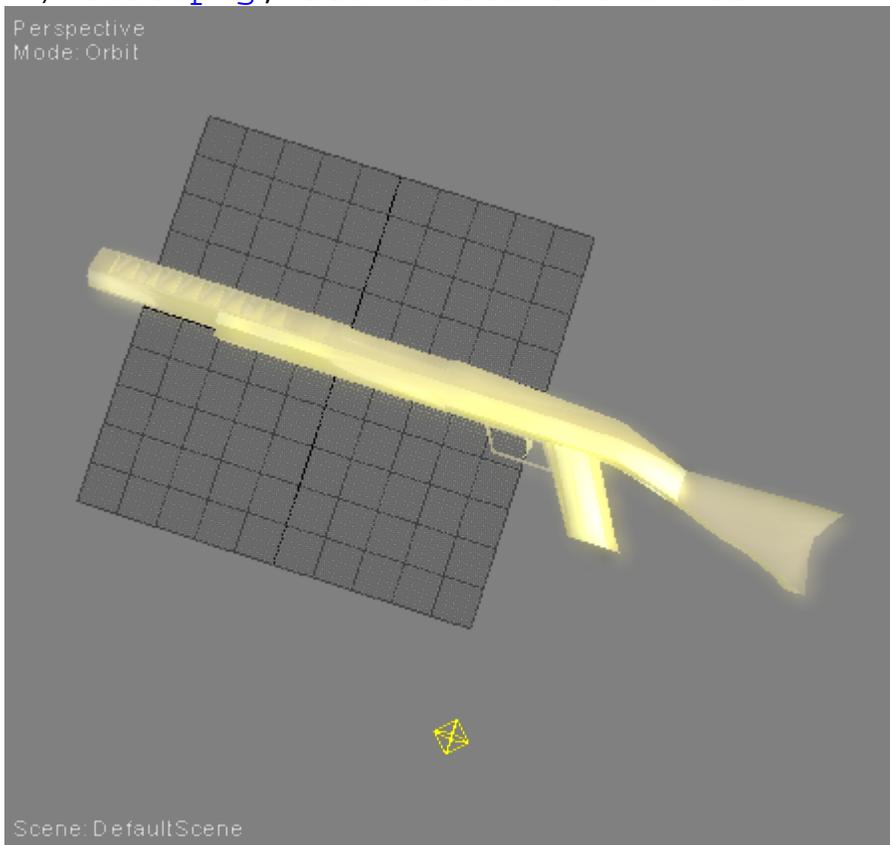

Anyone making shaders please tell me what you think that i can use best to make shaders. May be free or payed but prefer free

Thanks

EDIT:
Picture of one of my tries. Has Bump and Bloom effect.

Protip: Shaders are NOT written in C++, they are written in 3 ways primarily; GPU assembly, Cg/HLSL, or GLSL...

Stuff NVidia FX Composer has

For the picture i uploaded in my first post i used the HLSL FX profile.

EDIT: @Saberhawk: What do you use???

EDIT: @Saberhawk: What do you use???

Notepad++ and the "rss" console command of "shader developer mode" in shaders 4.0 (resetshaders - reloads all shaders used by shaders.dll)
