Ok...im havin a problem with BRenbot every thing starts out ku but then it tells me "[BR] Warning:The FDS has not responded to the last two status requests, it may have gone offline." I read the last topic that said this but i didnt understand how to fix it still ...so if anyone can help or has any ideas please help.

Are you sure that the FDS is running fine?

If it is are you sure that BrenBot is configured to access the FDS properly with the right password and IP etc.

Make sure you have followed everything on this guide, and if a problem persists reply here.
