Hey,

i have a little Problem with my RenX,  
If i make at RenX a Reflection effect/or some other effects and try to save it,  
it wont show up ingame or at w3d viewer(and in w3d viewer is material list empty)

Someone know whats the Problem?? I think it is the w3d exporter, but im not sure.  
ps: At 3ds max i got the same Problem!

,

when you press m and setup a material you have to click assign materials.

i know...

but if i make a only a pass1 model and export it, it works perfect.  
But if i try to make a pass2 model, for example a box with reflection. And export it, then i load it  
into w3d viewer,  
what i got: onyl 50% of the box, no reflection and in the material list is only the pass 1 texture.

I dont know whats the problem :/

here i made this reflection with 2 passes and i would say its a normal reflection on my cheap exterior

and scrin it isnt your reflection

Allright I'll show my way of adding reflection.

You can see a sample in my video with the skating park. On the halfpipe.

[http://www.youtube.com/watch?v=q1tq-DOM0ZM&feature=channel\\_page](http://www.youtube.com/watch?v=q1tq-DOM0ZM&feature=channel_page)

Here are the screenshots how to do it (only 1 pass needed)

Note\* I might used JPEG format in my screenshot, but you need .TGA

spoiler

hmm, i always did that way, but i never thought of using stage 1, i used another pass, thanks for

the info
