I have finally finished a Beta pack which contains a lot of the old Renegade assets.

Most of the assets are working and ready to use but some need patching up especially the weapons. This pack (sadly) doesnt contain every beta asset there is. If anyone has an addition for this pack please message me so I can update it. If you update/fix an asset please contact me so I can update the pack.

A lot of the models are fixed by persons in the Renegade community. (halo37,exdeath,rrutk,diehardnl etc.) Each pack will contain a seperate readme/liscence please read those first! You can use any thing from this pack according to the liscence added to it. Always credit the original author.

Contents:
Here is a list of what the pack does contain. I have also added the scans from the pcgamer 1999 so you have some information. (uploaded by Mighty BOB! at cnc-source.com). I have tried to supply gmax files where possible.

There are buildingsw in this pack like the nod beta advpowerplant to an old gdi repbay (animated!)

Download link:
http://www.renz0r.net/Renegade_Beta_Assets_pack_1.0.zip

I will send a pm to Ironwarrior so it will also get mirrord on game-maps lateron.

(Filesize is 88mb so I cant attach it)

I would like to thank Stefan/Zeth for helping me with this beta pack.

Nice work Reaver! I'll check out some of the models, maybe I can fix some so it will be possible to

use them in Renegade.

The Beta humvee looks awesome...no idea why they scraped that.

Can someone make that one work in Renegade?

or if anyone has it release it....

The gdi harvester is in gmax format in this zip just export it as the same name as the harvy ingame and you should be done. (Take gdiharv02.gmax)

Dont know it for sure I think Diehardnl has it working?

Nice, is there a texture for the silenced pistol?

Subject: Re: [Release] Renegade Beta Collection
Posted by JeepRubi on Tue, 09 Jun 2009 16:01:49 GMT

Are those in .max, .3ds, or .gmax?

JeepRubi wrote on Tue, 09 June 2009 11:01Are those in .max, .3ds, or .gmax?

Mostly all are in gmax file format for some there is also a .w3d file added. If you really need a file in a different format I can convert it. Not sure if all the textures will port properly.

Edit: there is no finished texture for the pistol :s
