Co-op in lan won't work anyway as you'll both join a different side (if u join GDI, he'll join Nod).

there was a patch somewhere that lets you play on the same team, there also are maps like bot challenges, which will keep you occupied for some time. You still spawn at the same side there  
EDIT: Try this

Oh it's for level edit anyway do this:

- 1)Download this
- 2)put it in your data folder
- 3)When chosing the map, where there is written <None> Chose Bot chalange 2.
- 4)Press Start game
- 5)Enjoy

it's for as many players you want.

You don't need an account to download from filefront.
