Add to Hud.ini this line:

HidePlayerList=true

Preview:
Toggle Spoiler

If you dont have the Hud.ini then do this:

Create a new .TXT file, rename it to "Hud.ini".
Place it in Data folder and fill in this:

[General]
HidePlayerList=true

Use this: http://ren.game-maps.net/index.php?act=view&id=1152

If you use a hud like Deathlink's hud you have to remove that first or it won't get rid of the whole hud.

Actually just deleting the hud.ini seems to get rid of it without deleting any of the files.

Or open console and type `hud` to turn it off (needs 2.9.2 or higher though)
