Im trying to find a way to alpha blend 3 textures on one mesh. does anyone know how to make 2 alpha channels on one mesh in gmax. Vertex paint creates only one alpha channel and then alpha blending gets the gay scale of the alpha channel and applies the texture.

Edit:

I managed to make this effect

RenXc Alpha Belnd Tut

First of all, follow this tutorial <http://renhelp.net/index.php?mod=Tutorials&action=view&id=19> , but skip the vertex paint part, you'll also have to convert the terrain to an editable mesh/poly before adding UVW maps.

when you've done that, follow this tutorial.

Make sure Valpha is checked in the W3D export settings
Export your map.

Put your terrain in Reborn LevelEditor, click on Lightning > Vertex Solve

check Occlusion and then hit Ok

that's about it now go be creative! ^^

oh, by the way, Pass 2 is still your *main* texture, but pass 1 swapped place with pass 3. black vertexes belong to pass 3, grey vertexes belong to pass 1.
