Never got round to reinstalling ut3 and even then wouldn't have thought to check out the textures.

Awesome! Thanks.

Thank you for releasing. I will be filing through it for the next hour or two.

Next time, don't upload to rapid share please. Rapid share is basically useless because Pack 2 takes up all of your free daily usage.

S.T.A.L.K.E.R: Shadow of Chernobyl uses .DDS files, so that game is also exportable (easily) for the people who are wondering.

How big is the file? 300mb?
And he's uploading it on presumably his home connection. Give him a break, providing a download link and a mirror is nice enough of him

Uploaded the megaupload version.
I uploaded stuff at a rate of 45 kb per second.
To DutchNeon: UT3 has packages and you cant export stuff from cooked packages because they are made by the game company. So i used this program to capture textures while i was playing the game. I played the game for an hour and got these textures. The hardest part is the remove junk stuff like normal maps because they get captured too and some unneeded 64x64 images.

EDIT: i didnt know that there was another pack so i uploaded it to megaupload.

not much game owners do something about things like this, AFAIK
(allow stuff being ripped)
