I'm updating the ubermappack today and i'm looking for maps that are not already in the package.

Contents of the current UberMapPack can be found here:
http://www.game-maps.net/downloads/renegade/mappacks/ubermappack.txt

If you have a new map which should be included then please provide a downloadlink too so i can download it.

You may add my ancient Renegade map Snowstorm. It's a little polygon-heavy but fully functional.

Sadly I lost the files for it and also those of an updated version...

Anyway, I attached it to a recent post on the APB forums here:

It's the lowest attachment.
