Some time ago i found a link in a guy's journal that claimed that that is the beta of ren. The post was made in 2001 and he doesn't remember the password. Could it be the one? i think many people know about this thing but cuz of the password just left it alone.

I believe they have signed and Nda disclosure or however it is called. Normally those will last 4 years. So i expect it could be legal to release it.

The thing is I don't know what kind of liscense those beta testers had only they how have it know it

Besides that I have no clue who has that beta. (I have gusses though)

Edit: btw this is just a connection to the server which means the file could already be gone.

You will either need someone from EA or someone who has had the beta before.

2nd issue the file might not even be there anymore. Since this is only the thing to connect to that server.

My best guess is to find someone who has participated in the beta. Mayby ack or crimson did participate.

Im quite sure EA didnt delete / lose the files. If you check out the old intro movie on youtube you will notice a flamethrower infantry. Which resembles the blackhand from cnc3. (Even the third eye thingy or what it is). Only it doesnt have that cape.

Even the flamthrower it has matches quite a bit.

As far as EA goes all the stuff in the old Renegade is still worth of ideas or as usage of concepts.

Since EA (mostly) is good ideas for cnc, I doubt they have deleted the old Renegade stuff.

They probably have the assets left, but its not like they just changed it all at once. It's like asking me if we still have the renegade-x build from when we did the new years trailer. Of course we don't it's been added to and modified since then.

My mate from renegadeforums.com found a link in renegade.ea.com for a beta and it asks for a

username and password. http://renegade.ea.com/BT_12-05-01_V72.zip Any luck of giving this out. Even if you people have the e3, give it out man, people would love to play it.

Jeez, you could at least have explained what exactly we were asking for... For all we know, he never even played Renegade!

Maybe you could ask for EA's permission to release the beta? An official statement that the original confidence contract is no longer of any value towards them and that they accept the official release by the original beta testers?

its easy they can use it for other games like cnc3. If you look at multiple assets like the old single player powerplant. Which happens to match allot with the cnc3 powerplant. (you should check the beta movies from tesla7zap on youtube)

These assets are simply design stuff that ea can easily re-use.
