After trying to load a Map W3D (example mp_Under.W3D)
i always get this error:

Anyone know how to fix it? how to fix it in the Script itselfe?
Same Error on 3DS MAX and RenX.

It's "W3D files", not "W3D´s".

I had the this kind of a problem too.
What i did is i imported it to Renx. Then i went to the utilities tab and clicked more. Then there is something called UVW Remove. Go there and click Material button. Then export it as w3d and import it back in 3ds max as a w3d. Hope it helps!

It's more of a problem with the W3D plugin.
