on the new flying maps nonoe wanats to play defence so what if they change teh becon disarming to 400 or 500 points to give people an incentive to stay on deffence plus on teh flying mpas the becons are harder to find so it makes sence to reward more points and such.then maybe instead of everyonewanting to attack more people would stay back on D

Ramjet rifle all the way! j/kThis post belongs to RA2 section but I can give u the answer. Send a squadron that consists of 8 IFVs to engage it before the Kirov reach your base... Tada you just earned urself some dead Kirovs.
