Once the PP is down, take out the OBL, (I tank rushed it, took it out just to find out I needed to take out the PP). Anyway at the end of the dam is a door. it will auto open when you walk up to it....

You just retrace your steps. You entered that part of the map on top of the dam, remember? The Obelisk was right in front of you.

to destroy the OB use the reinforcements as OB targets then rush in with your tank

Take the elevator down to teh walkway above the spillway. Enter the tunnel and take the elevator up. You will come out in another tunnel and look for another elevator up. If you miss this elevator

you can retrace your steps and take the elevator up at the afr end of the ****. Either way you are now on top and you blow the ob or not(it is a bonus goal) The large door will open when you walk up to it. If this doesn't help you check to see if the walkthrough at www.planetcnc.com is done yet.

oh yea. Now I remember those darn tunnels. It takes time, using the lift and heading up to the dam. Sorry I can't give more help. Its hard to remember that level in detail.[April 24, 2002:
