I frequently don't see my posts, and am instead greeted by a blank screen. Cheap ISPs FTL. I'll clean this up.

I have the same problem, but I just installed Core Patch 2 and scripts 3.4.4

---

It is the first time I can go to WOL on this computer.

My previous error was related to lack of admin rights.  
It bothered me in this computer ever since I installed Renegade (TFD).

By the way, I'm using Windows Vista.

--Edit--

I recently noticed it wont say: "Requesting Server List".  
And it wont say anything to me Nightma. That might just be the problem.

You should try reading what Renegade says to you before complaining to us.
