Yes in a way, downloads for mapping and modelling will be added to the Game-Maps.NET website but links will be placed upon RenegadeHelp.NET

I'm still trying to decide if to allow direct links, so you can download files without skipping ot Game-Maps.NET or to forward you to the file on Game-Maps.NET to download there.

There are postives and negatives for both ways.

A lot of Mapping/Modding stuff can be found on Game-Maps.NET for now, example like the Renegade Beta models and few odd bits.

If you got ideas or wish to suggest anything please do.
