ok i found renlist and now i can play ren again
so im back.

i wanted to modle a bit on my new pc
and installed renegade publictools
but how i can open renx again?
yes i have gamx registered

Welcom back xD

if u have gmax installed u should just be able to click on the renX icon in ur renegade public tools
folder and it should open

when i click on the icon
there appears a message that my pc cant find a file with the name :
renx.ink

Make sure you installed the Renx plugin with rentools installer.

Then it should be located at gmax/gamepacks/westwood/Renx

it is there
but i just took the old gmax from my old pc

must i re-download it to get renx work??

I would advice to reinstall it. I never tried copy and pasting Gmax/renx around.

yeah, reinstall gmax. Be careful, for me gmax wants to install at C:\gmax\ whereas RPT expects it to be in C:\Program Files\gmax so make sure they match.

And welcome back
