When i try to load my map Emptyness (yes it is complete empty, just a plain heightfield) it crashes after i loaded the map. I have a (almost) complete empty always.dat so it has only the required files to run (http://www.renegadehelp.net/Tutorials/TUT_Full_Con/Required%20Renegade.rar) so it's a clean start again. I modified the spawner to use the file c_ag_havoc.w3d

Here is my Editor output and the crashdump. I hope someone can help me out.

Editor output

Poskov wrote on Sat, 29 August 2009 05:24you're missing too many textures Textures is never a problem. And besides that i only miss 2: dirt 01.tga and ren spawn.tga

Fullmoon.tga is ALWAYS missing. Even in normal Renegade

If a texture is missing it will just replace it with the WESTWOOD logo.

maybe something's wrong with the spawner

The map doesn't have spawners therefore i should spawn at 0,0,0

With spawners it crashes too.

When i do walkthrough in LE it works normally and it has the same settings ingame as in walkthrough

If Havoc == CnC_GDI_MiniGunner_3Boss then yes

I made a new preset with the Havoc model and pointed the Spawners to the new preset (one for Nod, one for GDI both Havoc model)

EDIT: Well it HAS to be a wrong preset but i still can't find it :S

I hope to find it though

Would be easy to find it if there was a list of standard loaded presets on map load

i've done it somehow, but i'm still not sure how, because i edited the soldier preset, and created new startup spawners, also edit the original. And it worked but i'm still not sure which combination did try it

you cant add new presets to the start up spawner it wont work. change CnC_GDI_MiniGunner_3Boss to CnC_GDI_MiniGunner_0 then change the the solider into something else.

OMG that's just FAIL... WHY would it ever work that way? :S

So for nod it would be CnC Nod MiniGunner 0.

I'll try now. I hope you are right

Reborn seems to have that entry still in the presets so i guess it will work

Thanks in advance

EDIT: GREAT IT WORKS Well that is for GDI only but still ^^

BUMPYBUMP

Nod still doesn't work
