lets think for a second...1)you can't put humvees on aircraft...2)for some reason ground vehicles flip off every vertical drop3)Westwood has made a remarkable game that is still remarkably laggy

Maby this happend.The buggy drove onto the ramp of the hand of nod, an appache then landed beside the ramp, the buggy then drove on top of the apache, the apache takes off and for some odd reason the buggy stays put, then when near a infantry the buggy drove off and landed on him. Only reason this might work is because westwood wouldn't of thought about vehicles riding on vehicles so they didn't put the script in that would make them fall off when they moved. Oh maby it was the lag, yeah, probably the lag.*yes I know I said then way to much *

I like the pre-patch lag. IT leg you do flips and drive a buggy on two wheels and awsome ****. But they fixed that, but they didn't fix the more serious ones.. I like the driving on two wheels bugyg **** it WW!!!   He probly was killed form it falling from cargo plane or lag, or the secret psychic char that shots and invisible beam that lets him pick up vehicles and move them arond. Whoops, I've said too much.
