OK so I talked to him via PM, he said he released the apache here, but i've done a thread subject search as well as sifted through his 22 pages of posts in his profile and came up with nothing.

Also I've seen a C&C 3 mammy before, don't know if he made it or not, but does anyone have it?

I'm making a Mammoth Tank skin currently as I don't think those two skins... Well, they don't even look like a tank.
