For those that like Tiberian Sun I have decided to release a texture pack which changes the standard maps making them appear to be more like maps in the Tiberian Sun universe where the terrain is mainly sand and rock.
screenshots

I have also decided to release the Tiberian Sun EVA and Cabal sounds. Although I did not make them myself (not sure who did), many people have asked about where to get these.
I also did not make the textures. They are from the map C&C terrace made by Titan1x77.

Below are links to videos which show what Renegade is like with these skins and sounds on.

Really inaccurate to say what it changes.

Can you make it more specific and tell us what it changes and make a more specific video?

Sorry about that, I was kind of in a hurry. I've attempted to explain it better.

I downloaded the pack and it works. Try downloading the Sound zip again. If it don't work I will upload again the next day.
