Hello people, I have an issue and it has been addressed on the forum but i did not not really understand how to fix it.

I am trying to install renegade on windows vista and have tried running compatabilty mode for 98 and xp and run as admin but i get the same error no matter what. Its when you have to choose the folder used for install and you get the stupid "make sure the syntax is correct" error. Please help me with this using a step by step if possible please. Thank you very much.

Did you try creating the folder manually before running install?

C:\Westwood\Renegade\

XP Compat and admin mode on for setup.exe on the CD ROM.

Does that do it?

UAC on --> admin mode means it may as well be off.

UAC off --> admin mode not available, as everything is in admin mode (This is a generalisation, might not be technically correct)

Are you using a legal CD? Are you using TFD?

Is it a DVD with "The First Decade" on it, or a CD with "C&C Renegade" on it?

*on the same disk.

I mean: if windows is installed on c:\windows , then are you also installing renegade on c:\westwood\ ?

Check this as well: http://www.renegadeforums.com/index.php?t=msg&goto=348960&rid=4882&rch=syntax#msg_num_6
